Bulletin No. 32

NEW SUBB - JUST ARRIVED INTO STOCK - PCD 5/127 & 5/120

Please be advised that we have just received into stock two new SUBB wheels to suit the new Chrysler Jeep Wrangler, Commander & Grand Cherokee models.

These vehicles have a unique 5/127 PCD, so we have manufactured the new 18x8" and 20x8.5" SUBB at P45 offset to cater for this new specification.

Note: As the SUBB has a full cover cap, we have been able to multi drill both of the new SUBB's with 5/127 & 5/120 PCD. This enables us to pick up Commodore applications also.
